

Andrea Giovanni Perozziello

Academic Qualifications

University of Bologna — <i>PhD in Agricultural, Environmental and Food Sciences</i>	Nov. 2025 - Present
EPFL École Polytechnique Fédérale de Lausanne — <i>Master in Computer Science</i>	Sept. 2021 - Jul. 2024
USI Università della Svizzera Italiana — <i>Bachelor in Informatics Science</i>	Sept. 2015 - Jan. 2020

Work Experience

FAO – Food and Agriculture Organization Central Africa — <i>Software Engineer</i>	Nov. 2025 - Present
– Contributing to digitalisation and traceability tools for agrifood value chains in Central Africa. Focus on designing data infrastructures and digital workflows supporting transparency, monitoring, and sustainability across supply chains.	
University of Bologna Bologna, Italy — <i>Research Fellow</i>	Jun. 2025 - Nov. 2025
– Conducted applied research on food waste reduction in Albania, Egypt, and Tunisia as part of international sustainability projects. Focused on behavioural economics, Life Cycle Thinking (LCT), and stakeholder co-design to evaluate and promote sustainable practices across agrifood supply chains.	
eProd Nairobi, Kenya — <i>Intern</i>	Aug. 2023 - Feb. 2024
– Led an agri-tech integration project enabling data-driven farming advice. Improved ingestion pipelines and database efficiency, integrating external data sources to enhance predictive insights (Python, MySQL, Delphi).	
EPFL Lausanne, Switzerland — <i>Object Oriented Programming Teaching Assistant</i>	Feb. 2023 - Jul. 2023
– Taught OOP fundamentals during exercise sessions. Coordinated and evaluated seven C++ final projects of fourteen students (C++).	
T&O Italia Milan, Italy — <i>Junior Software Developer</i>	Sept. 2019 - Jan. 2022
– Developed iOS solutions for CRM and order-entry systems. Optimized a computer vision pipeline for off-line image recognition and built an automated data workflow that contributed to a patented software process (Objective-C, Swift, MySQL).	

Projects

Master Thesis Project : MyFoodRepo – Enhancing Personalized Nutrition with LLM Integration	
Digital Epidemiology Lab	<i>Advisor: Prof. Marcel Salathé</i>
– Integrated a Large Language Model (LLM) into MyFoodRepo, a personalized nutrition app, by designing a scalable backend pipeline for dietary data processing. Developed and deployed AI-driven feedback models to improve dietary tracking accuracy and enhance user engagement. Implemented a REST API for structured data retrieval and storage (Python, SQLite, Flask).	
Master Semester Project : EcoLens – Raising awareness around food habits	
Data Science Lab	<i>Advisor: Prof. Robert West</i>
– Built a mobile app to analyse and rank the environmental impact of campus food choices. Designed a structured database and an automated pipeline for menu data, impact scoring, and reward tracking (Swift, Java, MySQL).	

Languages

Italian: Mother tongue — **English:** Advanced — **Spanish:** Advanced — **French:** Intermediate

Computer skills

Programming Languages

Expert Swift, Java, Python, C++
Confident Go, C, Objective-C, Javascript
Familiar Ruby, Haskell, Delphi

Other Skills

Shell
GIT, SVN, Docker
MATLAB, NetLogo
MySQL, SQLite, MongoDB, GraphDB

Frameworks

Backend & API Development:
Flask, FastAPI, GraphQL, SQLAlchemy
Data Engineering & AI:
Pandas, NumPy, OpenAI, OpenCV
Automation & Quality Assurance:
Pytest, Twilio, JUnit
UI & Frontend Development:
SwiftUI, Cocoa, Native, Firebase
